## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to a semiconductor device, classified in class 257, subclass 69+ and 204+.
  - II. Claims 13-20, drawn to a method of making a semiconductor device, classified in class 438, subclass 199+, 287+, and 330+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the invention I would not necessary imply unpatentability of the invention II, since the invention I could be made without '.... A second dielectric layer composed of a material different from the first dielectric layer' in claim 13.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Applicant's Attorney, Ms. Wei-Ning Yang, on 04 April 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2814

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
